

**Re. Covid-19 Testing Update  
January 2021**

We have been included on the UK Government website by the The Department of Health and Social Care as a private sector (non-NHS) provider who may be able to conduct tests for the presence of Covid-19, coronavirus (SARS-CoV-2). We meet the government's minimum standards for providers of general COVID-19 testing.

This does not count for 'Test to Release'. We are also not offering Rapid Tests.

The test used is a Self Swab PCR test. The self swab kit can be collected from the Laboratory in London or posted out to an individual. There must be a form received from Thrive Worldwide that is included with the kit as it is returned to the Lab. The kit can then be returned to the Lab in London directly or posted using the Royal Mail 24 hour service. Once the kit arrives at the Laboratory, they aim to turn the result around within 48 hours. To have a self swab test through Thrive Worldwide this will require a remote consultation with a Doctor to review the individual's situation and allow for the form to be completed and emailed.

Once the result comes back Thrive will email the results and a certificate (if needed), password protected to the individual. If positive, then the Doctor will also contact the individual to discuss and advise further. The cost of the test and consultation (with a risk assessment) is £210.

A handwritten signature in black ink, appearing to read 'ME'.

Matt Edwards

**Medical Director, Thrive Worldwide**
